

Amendments to the Drawings:

The original drawings sheets accompanying the application were poorly photocopied and hand annotated. A significantly more legible set of 44 Replacement Sheets is provided in Appendix A.

Amendments were made to the drawing sheets. The Annotated Sheets showing changes are presented in Appendix B. Each amendment is described in a comment box placed as near as possible to each amendment in the Annotated Sheet. In the Annotated Sheets of Appendix B, the symbol "#" refers to a Ref. Char.

Remarks/Arguments:

Amendments to the specification and drawings sheets have been filed.

Replacement sheets and Annotated sheets are presented in Appendix A and Appendix B respectively in response to the Office action of March 7, 2007.

The majority of the amendments to the drawing sheets concern moving the Ref. Char. for the grid inside the grid, adding Ref. Chars. to all the columns of the grid, changing Ref. Chars. due to duplicate use or errors, and adding new Ref. Chars. to reference further elements in the drawings to the specification.

The majority of the amendments to the specification concern the reduction of typographical errors, use of the wrong Ref. Char. or term, the addition of new Ref. Chars. to further reference elements in the drawings to the specification, and rephrasing of the descriptive language to clarify the description.

In some instances, errors present in the .html text available from the USPTO website database contained typographical errors which were not present in the two (2) column patent publication of the same text. Some of these errors were corrected with respect to the .html formatted text.

Respectfully submitted,
